***Allowable Subject Matter***

1. **Claims 1-25** are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claims (1, 10, and 20), the cited prior art fails to teach or suggest the claimed limitations with the reasons set forth in the Applicant's Remarks filed on 09/11/08, pages 2-5.

Newly discovered U.S. Patent Number 7,146,129 to Bostrom et al. teaches an improved remote control capability utilizing text-based messaging available on wireless telephony devices (see figures 1, 5, columns 5-6). A remote control device is located in an environment proximate to conditions to be monitored and actions to be implemented. The remote control device is able to receive and transmit wireless text based communications. A user employing a wireless communication device that supports text based messaging can transmit a control message containing a predetermined command to the remote control device. After preferably authenticating the user, the remote control device initiates a predetermined action based on receipt of a corresponding command.

However, Bostrom does not teach nor suggest a system including a mobile switching center for allowing a user to initiate a process for performing vehicle functions on a vehicle through a remote mobile communication, the mobile switching center (MSC) comprising: a recognition module operative to recognize a request to initiate the process for performing the vehicle functions from the remote mobile communication

device; an authentication module operative to authenticate that the user is valid and determine vehicles upon which the remote mobile communication device may initiate the vehicle functions; a query module operative to query the user through the remote mobile communication device as to which of the vehicle functions is to be performed; and, a communication module operative to transmit command signals to the vehicle to perform a selected vehicle function based on results of the query.

**Claims 2-9** are allowed by virtue of their dependency on claim 1.

**Claims 10-19** are the corresponding method claims and are allowed for the same reasons.

**Claims 20-25** are the means necessary for the system claims and are allowed for the same reasons.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
